

Notice of Study Commencement

Township of Alfred-Plantagenet Wendover Water Treatment Plant (WTP) Schedule C Class Environmental Assessment

The Township of Alfred-Plantagenet has initiated a Class Environmental Assessment (Class EA) to determine the most suitable expansion and/or upgrades to the Wendover WTP to effectively provide drinking water to the existing service population and potential future developments.

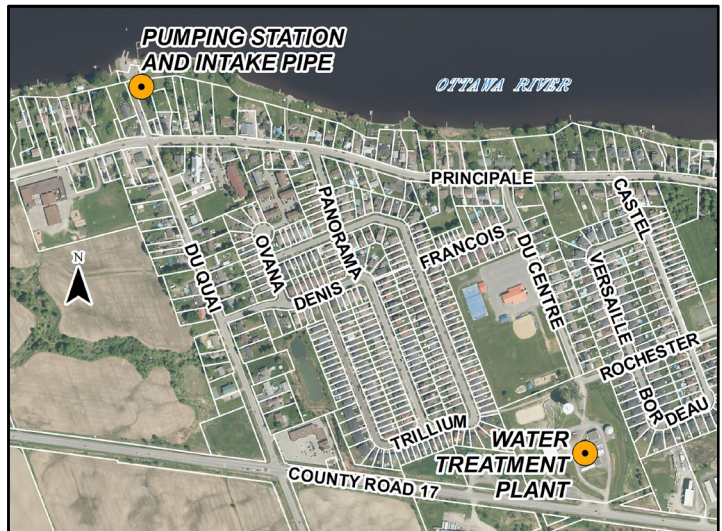

How Will This Affect Me?

The study will assess current & future requirements of the **Wendover WTP** and will make recommendations for upgrading and/or expanding the system to meet the needs of the Wendover community. Public & agency consultation is a key element of the Class EA process. Based on your input, alternative strategies will be evaluated to identify optimal community, environmental and economic opportunities.

How Do I Get More Information?

Two Public Information Centres (PICs) will be conducted in the summer and fall of 2026 prior to finalizing the preferred solution and preferred design concept. In the meantime, the study team is reviewing background data and determining alternative solutions.

Updates will be provided throughout the study on the Township website. If you have any questions regarding the study, please visit the Township website. You are also invited to contact a member of the study team at anytime with questions or to provide input into the study.

All personal information included in your request – such as name, address, telephone number and property location – is collected, under the authority of section 30 of the Environmental Assessment Act and is collected and maintained for the purpose of creating a record that is available to the general public. As this information is collected for the purpose of a public record, the protection of personal information provided in the Freedom of Information and Protection of Privacy Act (FIPPA) does not apply (s.37). Personal information you submit will become part of a public record that is available to the general public unless you request that your personal information remain confidential.

This study is being conducted according to the requirements of a Schedule C project under the Municipal Class Environmental Assessment process (October 2000, as amended in 2024).

This Notice was issued June 8, 2026.
